Planning Institute Australia,
Economic Development Chapter

Anthony is a Senior Consultant with Urban Economics, commencing in 2001 as a Research Analyst and subsequently promoted to Senior Research Analyst, Consultant and Senior Consultant. Anthony has completed a Masters in Regional Development and holds a Bachelor of Engineering degree, both conferred by the University of Queensland. Specialising in Chemical Engineering, Anthony developed a particular interest in environmental research and achieving a balanced approach to development and environmental planning. He has redirected his skills in statistical analysis and project management to economic and property research, augmented through his postgraduate study.

Anthony was conferred his Master of Regional Development in 2005, having completed his thesis investigating tourism development in local government areas in regional Queensland. He has a particular interest in working with regions to promote sustainable development strategies.

Recent Projects

- Economic Impact Assessment for a mixed-use in-fill project in Springwood on behalf of a developer, including analysis of retail office, retail showroom, hotel and residential components.
- Long term land budgeting assessment for a large landholder in Edmonton, Cairns.
- Employment and Centres Needs Assessment for Caloundra City Council as part of their LGMS process, which analysed the required provision of employment and centres in the City to 2046, including land requirements.
- Economic Needs Assessment of the Draft Concept Plan for the Wembley Road, Berrinba/Browns Plains area on behalf of Logan City Council.
