Urban Development Institute of Australia, Queensland

Anthony is a Senior Consultant with Urban Economics, commencing in 2001 as a Research Analyst and subsequently promoted to Senior Research Analyst, Consultant and Senior Consultant. Anthony has completed a Master in Regional Development and holds a Bachelor of Engineering degree, both conferred by the University of Queensland. Specialising in Chemical Engineering, Anthony developed a particular interest in environmental research and achieving a balanced approach to development and environmental planning. He has redirected his skills in statistical analysis and project management to economic and property research, augmented through his postgraduate study.

Anthony was conferred his Master of Regional Development in 2005, having completed his thesis investigating tourism development in local government areas in regional Queensland. He has a particular interest in working with regions to promote sustainable development strategies.

Recent Projects

- Centres Hierarchy Review for Townsville City Council, developing strategies for centre growth to 2031 as input into the amalgamated council's planning scheme
- Economic and Employment advice as part of the structure planning process for Ebenezer Regional Industrial Area on behalf of the Department of Infrastructure and Planning
- Economic input into the Greater Springwood Master Plan on behalf of Logan City Council, which involved a comprehensive analysis of the current and future role of Springwood as a Principal Activity Centre.
- Assessment of the supply and demand for rural residential land in Dubbo City on behalf of a developer, including an assessment of the range of housing stock and the economics of developing rural residential relative to suburban lots
- Numerous economic and planning need assessments as part of impact assessable development applications
